

As a starter application and for persistent liquid manure on slatted floors or slurry channels we recommend the use of

BioAktiv Professional Liquid Manure

Improves the stable climate

Less ammonia

Minimizes mixing technology

Homogeneous liquid

Dosage in the liquid manure pit

Dissolve **1 - 1.5 kg** per **100 m³** liquid manure in **1,000 l** fresh water and feed into the bottom third of the slurry tank.

Dosage in the stable

4 - 5 g / animal (young cattle, cows and bulls) / **week**

Add **50 g** to a watering can (10 - 13 l, with a sprinkling head) fill with fresh water and pour over slats.

Composition

Natural calcium carbonate with oxygen activation -

CaCO₃: 90,6 % / SiO₂: 6,4 % / Al₂O₃: 1,4 % /

MgCO₃: 0,7 % / Fe₂O₃: 0,5 % / K₂O: 0,2 %

BIOAKTIV[®]

PROFESSIONAL FARMING

Through constant contact with our customers, our sales team and our business partners ensure the regular exchange of results and scientific findings.

This allows us to continuously adjust our BioAktiv products to various influences and conditions. Through close collaboration with development, testing and sales, we are able to develop new quality products for our customers.

Our certification are constantly updated and checked so we can deliver you consistent BioAktiv quality.

Testing and analysis

Extensive testing and analysis guarantee the highest quality standard for continuous use.

BioAktiv Professional for Cattle, Calves and Calves Vital are suitable for use in Organic Agriculture conforming to the annexes of the (CE) regulation n° 2018/848 and Nr. 2021/1165.

BIOAKTIV[®]

Professional

CATTLE

What does BioAktiv do?

Through BioAktiv Professional Animal Feed Cattle and Salis Cattle, nitrogen is bound to the manure. So less ammonia escapes and the general health of the animals improves.

Calm and balanced animals, vital and healthy calves

Improves odor, less ammonia

Reduces stirring, lower energy costs

Improves feed efficiency and causes higher daily weight gains

Creates homogeneous manure

Decline in nervousness and aggressiveness

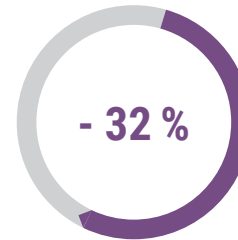

Feed trial with BioAktiv Professional Animal Feed Cattle

Application for dairy cows (Sàrl B.E.S., Emile BORSENBERGER, 31A Rue du Moulin, 57720 URBACH/EPPING)

The application test for dairy cows showed positive effects for fat content, cell content and the health of hooves.

Cell count

with BioAktiv 147 (thousand/ml)
without BioAktiv 217 (thousand/ml)

Fat content

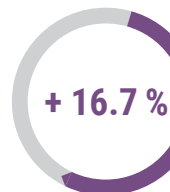

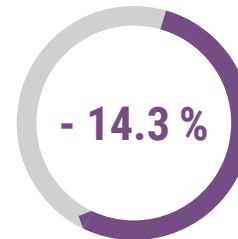

with BioAktiv 38.1 (g/kg)
without BioAktiv 33.5 (g/kg)

Application for beef cattle (at KERWEE LOT FEEDERS PTY LTD, Australia)

BioAktiv Professional Animal Feed for Cattle was tested over a period of 150 days. The application had very positive effects on the daily weight gains, feed conversion, herd health and mortality of the animals.

Feed conversion

with BioAktiv 6.6 (kg DM/kg LG)
without BioAktiv 7.7 (kg DM/kg LG)

Daily weight gain

with BioAktiv 1.15 (kg LG/animal/day)
without BioAktiv 0.985 (kg LG/animal/day)

BioAktiv Professional Animal Feed Cattle

5 kg / 20 kg

Dosage

Mix in with the animal feed.

2 g / per animal / per day

Composition

Natural calcium carbonate with oxygen activation –
CaCO₃: 90.6 % / MgCO₃: 0.7 % / Fe₂O₃: 0.5 % /
HCl insoluble: 8.0 % / Ca: 36.3 %

BioAktiv Professional Salis Cattle

5 kg / 25 kg

Dosage

Mix in with the animal feed.

Cattle 2 g / per animal / per day

Calves 1 g / per animal / per day

Composition

Sodium chloride with oxygen activation –
99.0 % natural sodium chloride, at least 38.9 % sodium
